

# Nigeria Open Contracting Portal (NOCOPO)

**Mr. Aliyu. E. Aliyu, Director, Regulations and Database  
Bureau of Public Procurement, Nigeria.**

# Talking Points

1

- The BPP developed the Nigeria Open Contracting Portal (NOCOPO) in 2018. The portal is about opening up public procurement in Nigeria through increased disclosure of procurement information to all stakeholders. The portal was co-created with Civil Society Organisations.

The NOCOPO portal currently has the pages for the MDAs to upload and CSOs/Citizens to monitor after publishing. The Upload information consists of information about: ***Planning, Tender, Award, Contract and Implementation.***

## Talking Points

- The OCDS describes how to publish data and documents for the procurement of goods, works, and services. It makes contracting data available for anyone to use, modify, and share, for any purpose.
- The Current system lacks some attributes of OCDS thereby requires an upgrade. The BPP is presently in the process of upgrading the system to address a lot issues based on feedback by users.

## Talking Points

- The Government has issued directives on uploading all Procurement Information (Procurement plan and records) on the portal but this has become one of the major challenges now. Only 50% of the total MDAs have some of their information on the portal.
- The BPP has conducted several trainings on the use of the portal and has so far trained about 400 MDAs and about 2000 staff.
- Some of the concerns of BPP is the quality of information provided by the MDAs.

## Talking Points

- Some CSO's are reusing the information on the system for their monitoring activities. Especially during the COVID period, the system was useful in providing information about COVID 19 procurements. However, the Upgraded system will give CSOs and Citizens more detailed Procurement Information.
- Nigeria is in process of deploying an e-GP system, which will integrate with the NOCOPO system and provide centralized access to all data.

## Talking Points

- **The BPP is keen in upgrading the system latest by June 2022 to be able to provide red flags and do some analytics to assist the Bureau in its Conduct of Procurement Audit/Surveillance and procurement decision making. This will help Government in achieving value for money and fitness for purpose.**
- **Upgrading the system will also strengthen the transparency, accountability and integrity of public contracting in Nigeria.**
